Contents

Foreword 1

Recent developments in process simulation for bulk forming processes 2
S.I. Oh, W.T. Wu, K. Arimoto

Aspects of forging of titanium alloys and the production of blade forms 10
Z.M. Hu, T.A. Dean

Evolution of the tribological characteristics of several forming die materials 20
M.J. Alinger, C.J. Van Tyne

Integrated finite element simulation for the hot extrusion of complicated Al alloy profiles 25
D.Y. Yang, K. Park, Y.S. Kang

Investigation into the rapid compression of semi-solid alloy slugs 31
P. Kapranos, T.Y. Liu, H.V. Atkinson, D.H. Kirkwood

Thixoforming of an aluminum component with a die designed by process simulation 37
C.G. Kang, H.K. Jung, K.W. Jung

Characterization of Al 7075 alloys after cold working and heating in the semi-solid temperature range 42
L. Sang-Yong, L. Jung-Hwan, L. Young-Seon

Different concepts of thixoforging and experiments for rheological data 48
R. Kopp, D. Neudenberger, G. Winning

Rheological modelling on semi-solid metal alloys and simulation of thixocasting processes 53
M. Modigell, J. Koke

Application of an adaptive grid refinement technique to three-dimensional finite element analysis of the filling stage in the die-casting process 59
J.H. Jeong, D.Y. Yang

Semi-solid roll casting of aluminum alloy strip by melt drag twin roll caster 64
T. Haga

Electromagnetic stirring and Sr modification in A356 alloy 69
B.I. Jung, C.H. Jung, T.K. Han, Y.H. Kim

Hot strip width control method by using looper tension measuring system in finishing mill 74
W.K. Hong, P.H. Kim, Y.H. Moon, J.J. Yi

Microstructure and properties of spray formed $Cr_{12}MoV$ steel for rolls 79
J.G. Zhang, H.B. Xu, H.S. Shi, J.S. Wu, D.S. Sun

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS Direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **www.elsevier.nl/locate/contentsdirect**

Elsevier Science B.V.

Fabrication and brazeability of a three-layer 4343/3003/4343 aluminum clad sheet by rolling 85
J.S. Yoon, S.H. Lee, M.S. Kim

Implementation of backward tracing scheme of the FEM to blank design in sheet metal forming. 90
T.W. Ku, H.J. Lim, H.H. Choi, S.M. Hwang, B.S. Kang

Hot forging of a nickel-base superalloy 98
N.K. Park, I.S. Kim, Y.S. Na, J.T. Yeom

Experimental investigation of the forming parameters of the rotational upset forging process. 103
J.H. Park, Y.H. Kim, Y.E. Jin

Use of UBET for design of flash gap in closed-die forging 107
V. Ranatunga, J.S. Gunasekera, W.G. Frazier, K.-D. Hur

Experiment on metal powder compaction by differential speed rolling 113
T. Hirohata, S. Masaki, S. Shima

Formation of a TiN/Ti_5Si_3 nano-grain composite by a non-equilibrium PM process 118
Y. Suehiro, K. Ameyama

Extrusion of nickel–titanium alloys Nitinol to hollow shapes 122
K. Müller

A study on the optimal tool shape design in a hot forming process. 127
H.H. Jo, S.K. Lee, D.C. Ko, B.M. Kim

Development of a new-type suspension spring for rally cars 132
K. Watanabe, M. Tamura, K. Yamaya, T. Kunoh

An UBET analysis of the non-axisymmetric extrusion/forging process 135
B.C. Hwang, S.J. Hong, W.B. Bae

Friction measurement in cold rolling. 142
Y.J. Liu, A.K. Tieu, D.D. Wang, W.Y.D. Yuen

Application of neural networks to predict the width variation in a plate mill 146
M.S. Chun, J.J. Yi, Y.H. Moon

An approximate deformation analysis and FEM analysis for the incremental bulging of sheet metal using a spherical roller 150
H. Iseki

Application of an expert drawbead model to the finite element simulation of sheet forming processes 155
Y.T. Keum, B.Y. Ghoo, J.H. Kim

A hydraulic high-speed tryout press for the simulation of mechanical forming processes. 159
U. Konnerth

Characteristics of weld line movements for the deep drawing with drawbeads of tailor-welded blanks 164
Y. Heo, Y. Choi, H.Y. Kim, D. Seo

Investigation into wrinkling behavior in the elliptical cup deep drawing process by finite element analysis using bifurcation theory 170
J.B. Kim, J.W. Yoon, D.Y. Yang, F. Barlat

The tube bending technology of a hydroforming process for an automotive part. 175
J.-b. Yang, B.-h. Jeon, S.-I. Oh

Design and application of pliable blank holder systems for the optimization of process conditions in sheet metal forming 182
E. Doege, L.-E. Elend

Development of an integrated computer-aided process planning system for press working products 188
C. Kim, B.M. Kim, J.C. Choi

Computer aided design of rolls for reshaping processes from round pipes to "channel-type" pipes 193
M. Kiuchi, H. Moslemi Naeini, K. Shintani

Method of joining sheets by using new type rivets 198
K. Kato, M. Okamoto, T. Yasuhara

The Al-powder forging process: its finite element analysis. 204
J.R. Cho, Y.S. Joo, H.S. Jeong

The manufacturing of hard tools from metallic powders by selective laser melting 210
F. Abe, K. Osakada, M. Shiomi, K. Uematsu, M. Matsumoto

Modeling and numerical simulation of residual stresses and birefringence in injection molded center-gated disks 214
Y.B. Lee, T.H. Kwon

Melt front surface asperity and welding-defect generation in ceramic injection molding 219
Y.H. Chung, K. Kato, N. Otake

A study on fiber orientation during the injection molding of fiber-reinforced polymeric composites. (Comparison between image processing results and numerical simulation) 225
E.G. Kim, J.K. Park, S.H. Jo

A study on fiber orientation in the compression molding of fiber reinforced polymer composite material 233
C.H. Park, W.I. Lee, Y.E. Yoo, E.G. Kim

Basic study of ball end milling on hardened steel 240
Y. Kita, H. Furuike, Y. Kakino, H. Nakagawa, T. Hirogaki

Improvement of the accuracy in the machining of a deep shoulder cut by end milling 244
S.-K. Lee, S.-L. Ko

Chip load prediction in ball-end milling 250
Y.-H. Jung, J.-S. Kim, S.-M. Hwang

Evaluation of machinability by cutting environments in high-speed milling of difficult-to-cut materials 256
S.W. Kim, D.W. Lee, M.C. Kang, J.S. Kim

Study on heat transfer in super-high-speed grinding: energy partition to the workpiece in HEDG 261
T. Jin, G.Q. Cai, H.D. Jeong, N.K. Kim

A comparison of the cooling effects of compressed cold air and coolant for cylindrical grinding with a CBN wheel 265
H.Z. Choi, S.W. Lee, H.D. Jeong

A study on the kinematics and dynamics of a 3-DOF parallel machine tool 269
G.Q. Cai, Q.M. Wang, M. Hu, M.C. Kang, N.K. Kim

Process monitoring of centerless grinding using acoustic emission 273
H.Y. Kim, S.R. Kim, J.H. Ahn, S.H. Kim

The integration of rapid prototyping and CAE in mould manufacturing 279
K. Kuzman, B. Nardin, M. Kovač, B. Jurkošek

Development of rapid tooling for sheet metal drawing using nickel electroforming and stereolithography processes 286
P.K.D.V. Yarlagadda, I.P. Ilyas, P. Christodoulou
